Follow the steps below to complete the LiveKit registration.

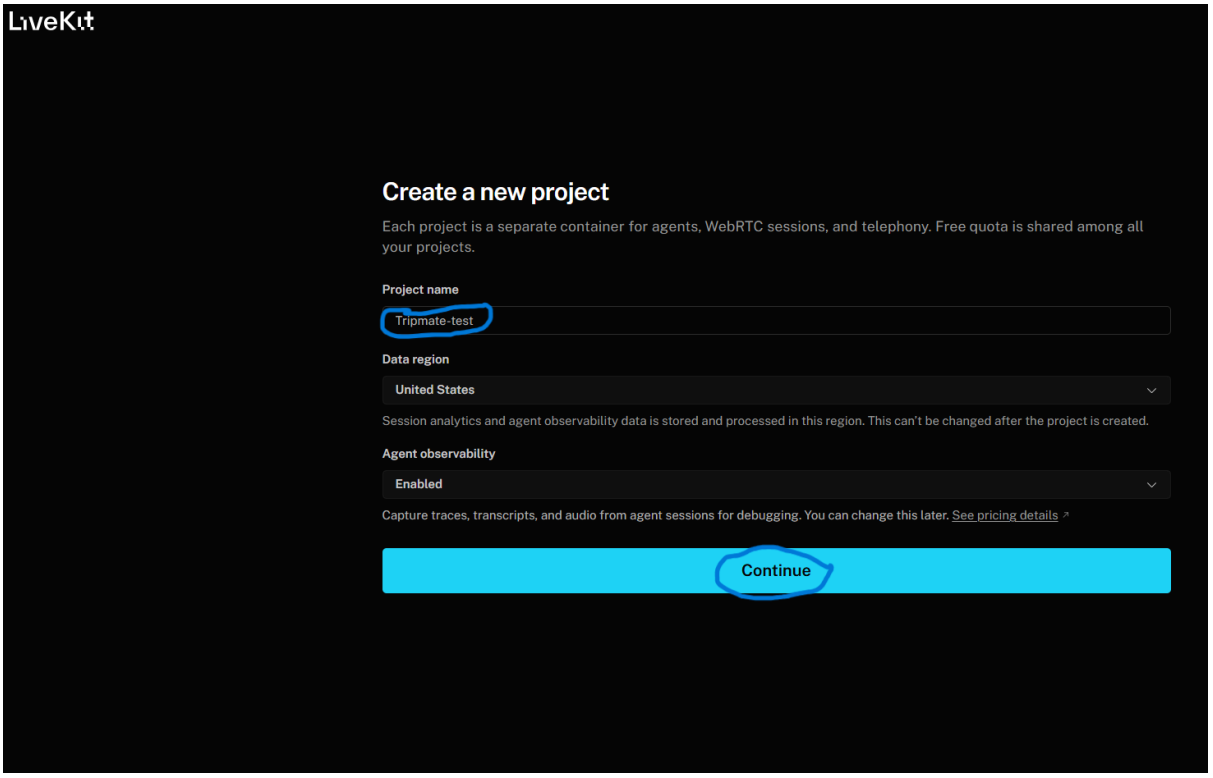

1. Sign in to livekit:

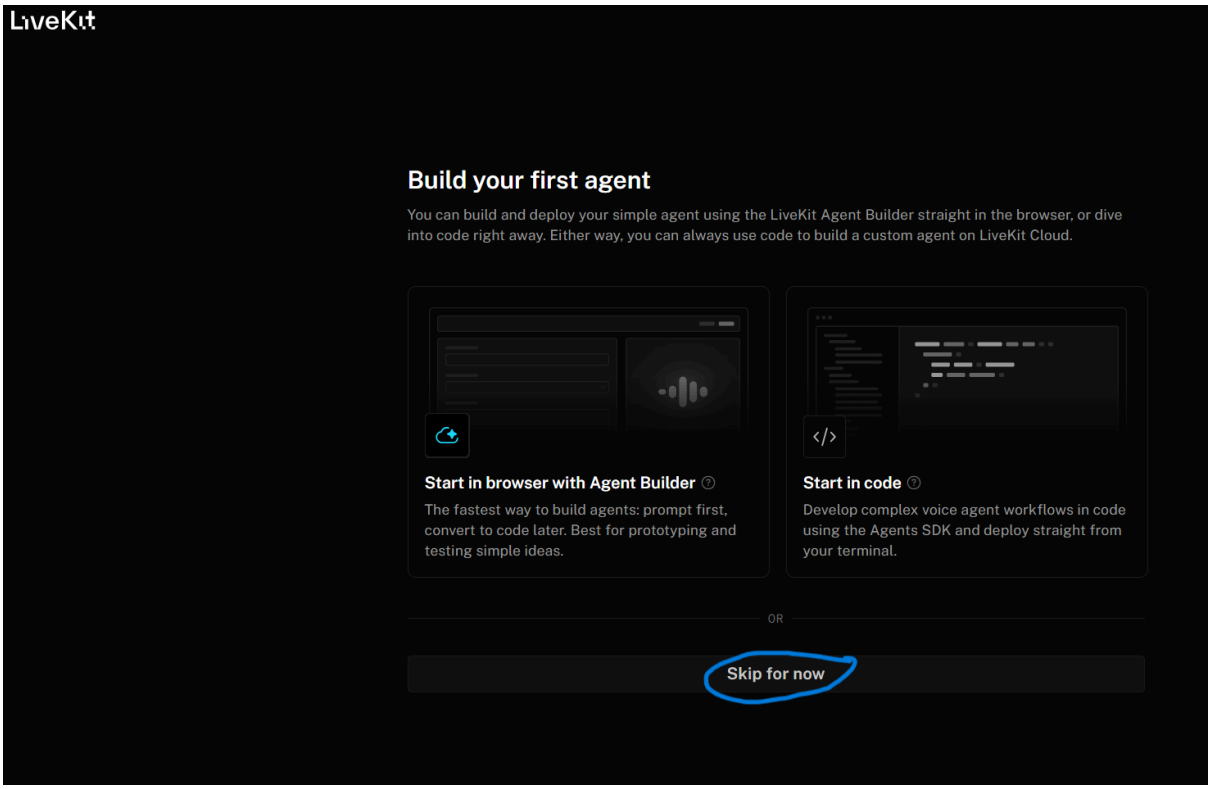

2. Create a new project-
    a. Click on the folder icon in the left panel
    b. Click on “Create new project”

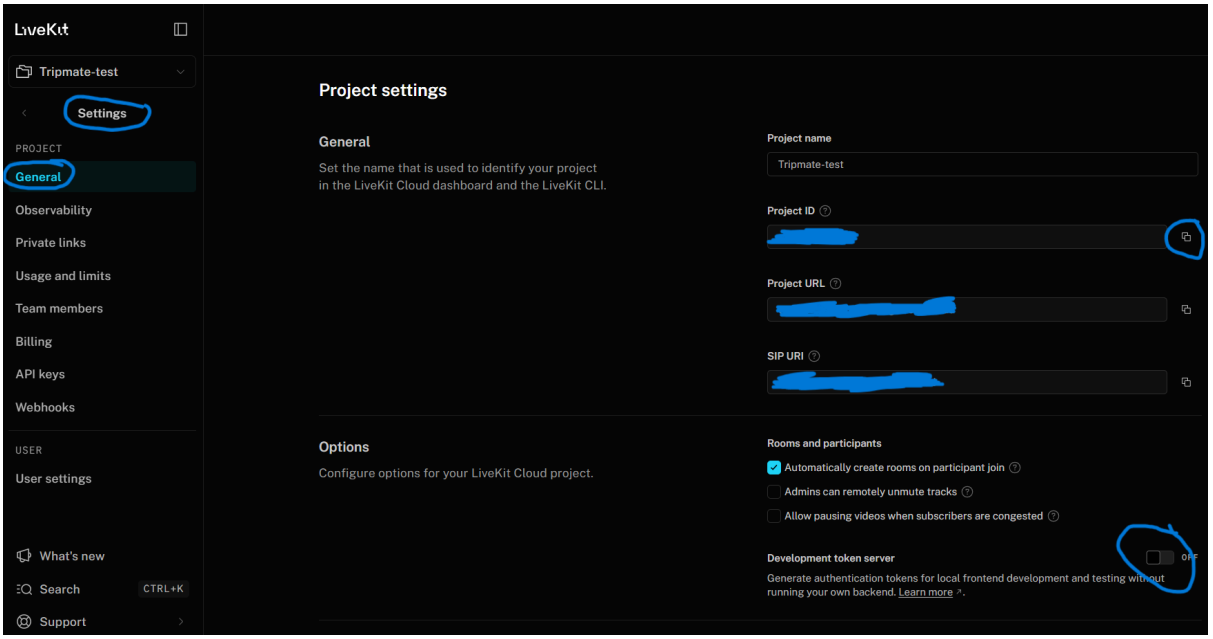

3. Provide project name and then click “continue”.

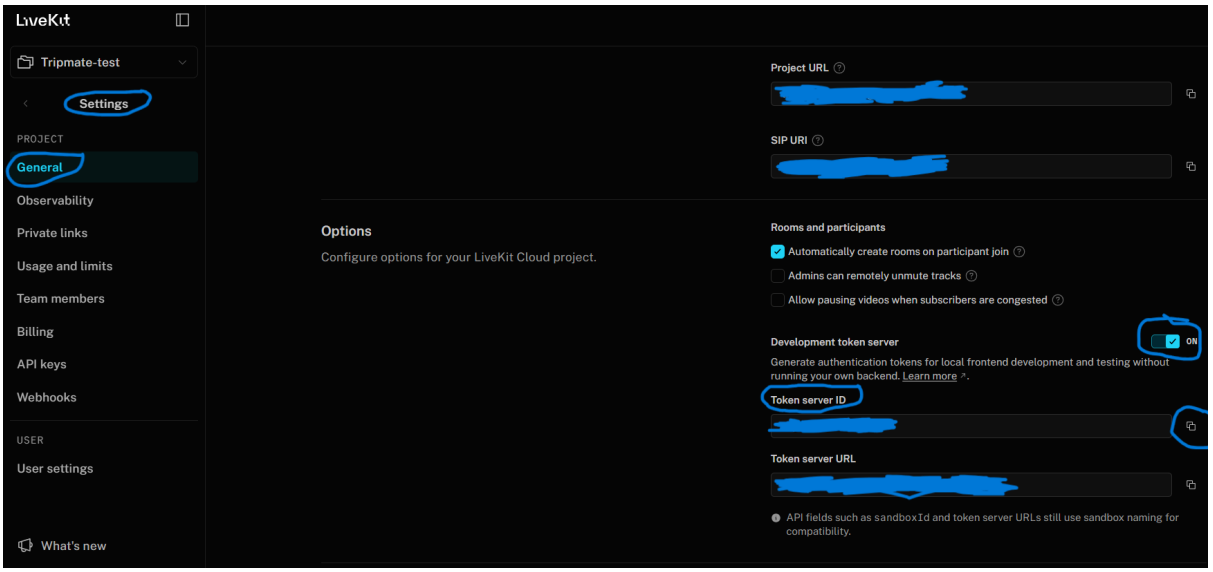

4. Click- “skip for now”

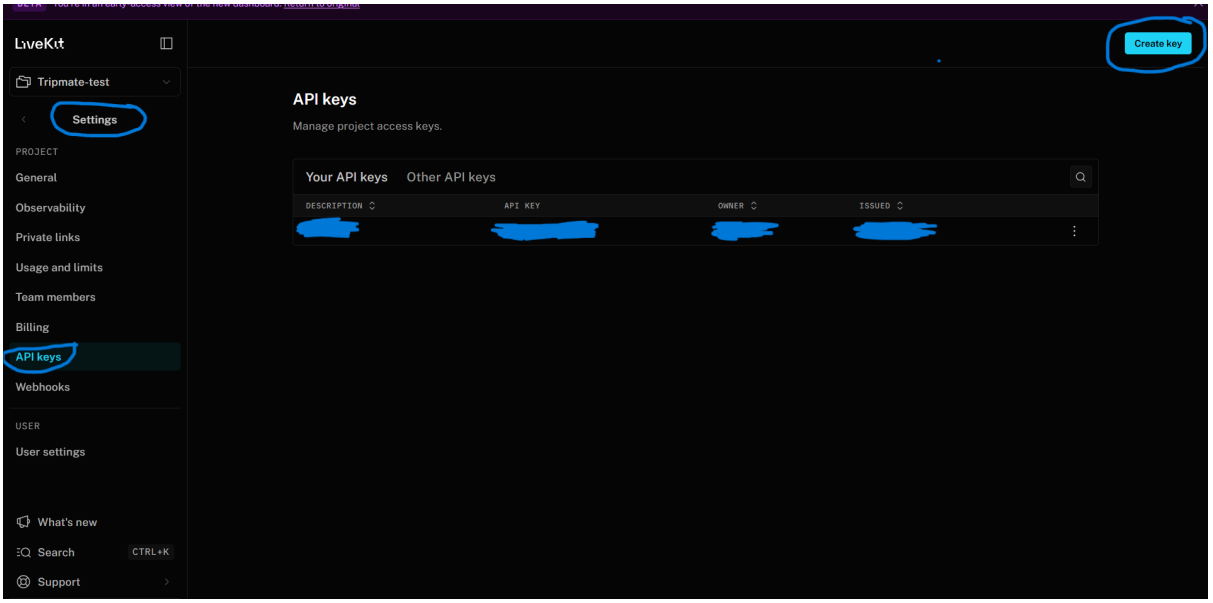

5. Go to “Settings” => “General”
    a. Copy and save project ID in notepad
    b. Turn on “Development token server”
    c. Copy and save **token server ID** in notepad (will be needed for UI)

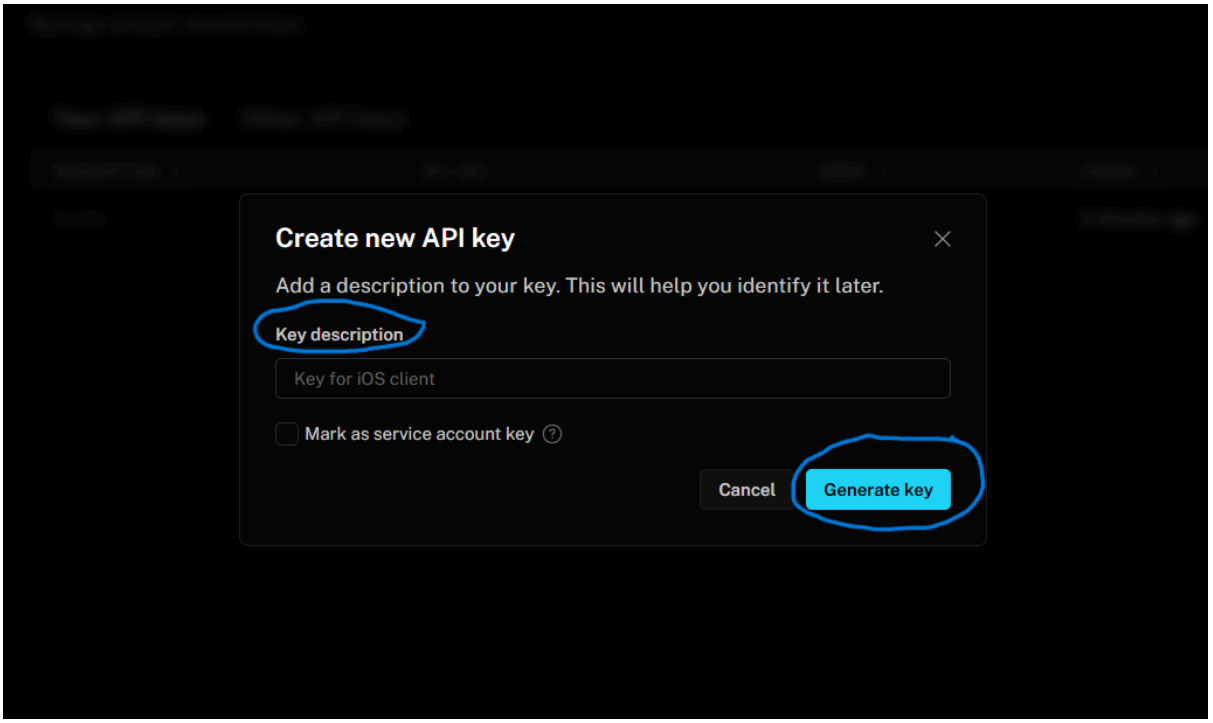

6. Go to “Settings” => “API Keys”
    a. Click “Create key” in the top right.

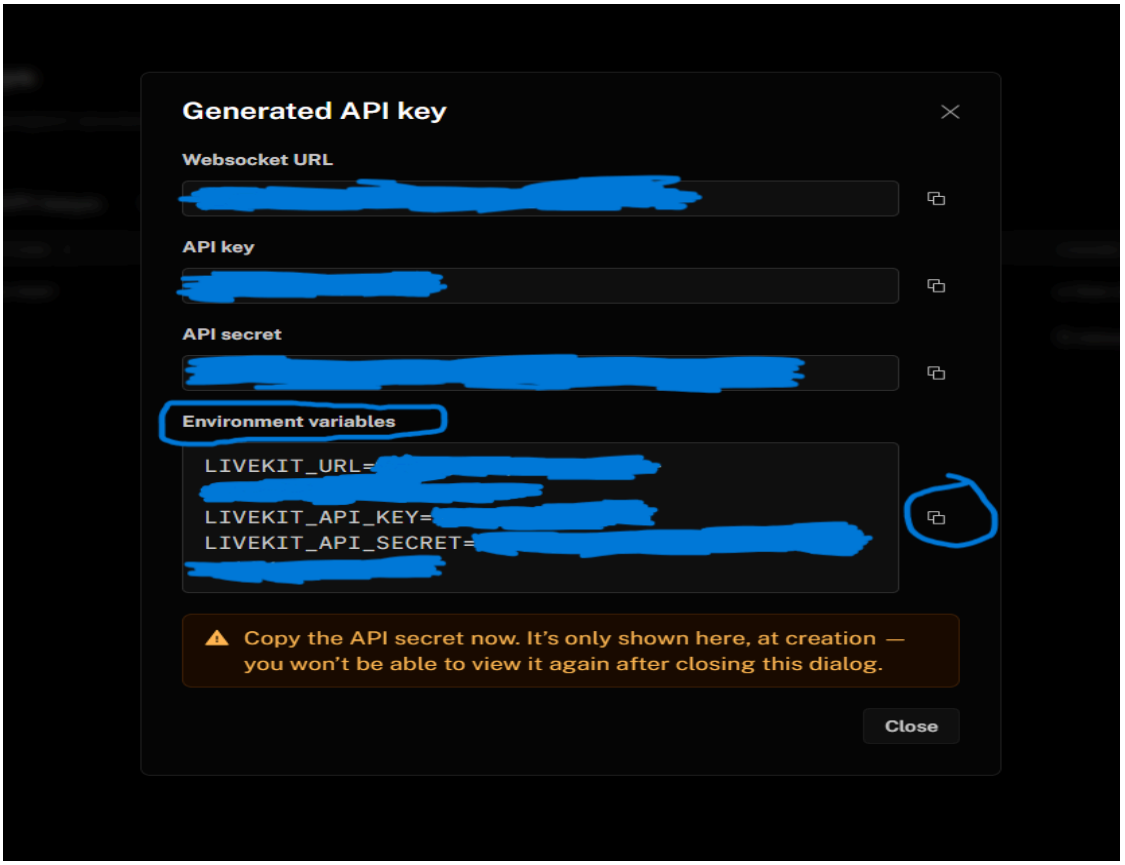

7. Provide key description and create a new key.

8. Copy and save all three environment variables in notepad
   (will need to set these three env vars in google collab notebook)

LIVEKIT_URL, LIVEKIT_API_KEY, LIVEKIT_API_SECRET

At the end you must have 4 values in your notepad.

1. **LIVEKIT_URL**
2. **LIVEKIT_API_KEY**
3. **LIVEKIT_API_SECRET**
4. **TOKEN_SERVER_ID**
